

I am a flight attendant for United Airlines and have been flying since 1993. I am strongly opposed to your NPRM to relax restrictions of cell phone use in flight. Please strongly consider the following:

- There is no hard evidence that cell phone use doesn't interfere with navigational instruments.
- Cell phone use could enable terrorists to coordinate a plan of action more effectively.
- The NPRM would leave it up to flight attendants to police the use of cell phones onboard the aircraft compromising our ability to maintain a safe, secure cabin environment and to conduct emergency evacuations.
- It would make an already tense cabin environment even more stressful.

I thank you for taking time to address these concerns.
